IBM Technical Expert Labs Assets and Utilities

Empowering users and administrators to connect, communicate and realize their requestsDo

IBM

Highlights

Take advantage of your platform in more places and in more ways

Increase security in dealing with your documents

Increase user engagement with powerful administrative and analytic tools

Leverage your platform more quickly by migrating your existing data

IBM Software Services offers new applications to help you realize an increased return on your BA investment. These applications help users to handle requests easier and allow them to rapidly implement new requierements. Knowledge and ideas can be found through analyzing content from multiple channels and sources.

In this way innovation and business execution rates increase, better decisions are made and customers and employees are more engaged and satisfied. Furthermore by using these tools requests can be realized in a more time and cost saving way.

Archive and Export Tools

High volume document import and export to/from IBM backends for several formats.

ASSETS

IBM AFPArchiver
Get your AFP-data archived fast and easy. Import large number of AFP-documents within short time into IBM FileNet repositories. Furthermore optionally, resources can be split out and stored as separate resource group files, which reduces the storage for archiving.
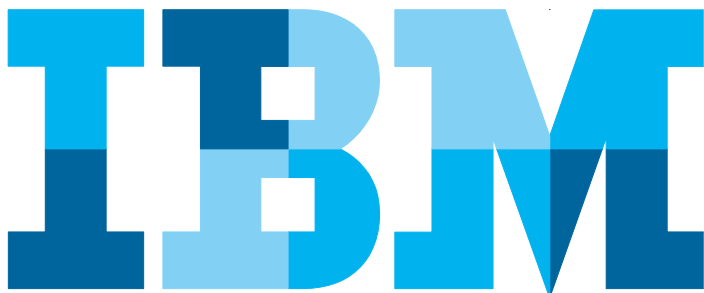

IBM BatchIt
Get your content archived fast and easy. Import large number of documents within short time into IBM FileNet repositories.

IBM Export for FileNet Image Manager
Exporting of any set of files as documents from IBM FileNet Image Services (IM) into the filesystem.

IBM TEXTimport
Get your TEXT reports archived fast and easy. Fast and easy import of high volumes of data streams into IBM FileNet repositories. Compressed deposition of documents in the repository.

UTILITIES

IBM Content Restore for Emails

This tool provides high volume restore for emails, archived into an IBM Content Respository (IBM Content Manager or IBM FileNet Content Manager) into the inbox.

IBM FileNet Image Manager PC Form Conversion

Convert old IBM FileNet Services PC Forms to a standard format. The tool converts IBM FileNet Image Manager PC Forms from IBM FileNet Image Services to a JPG format. The new images will be reimported into Image Services with the original index values, document IDs and entry date.

Clients

Take advantage of your platform in more places and increase user engagement through comfortable interfaces.

ASSETS

IBM Viewer for COLD

Display of documents, which are imported by TEXTimport or FileNet COLD, with IBM FileNet Workplace.

UTILITIES

IBM Dossier Accelerator

Extension that allows the user to work "dossier-oriented". Documents can be placed and processed in dossiers. The dossier structure is configurable and can be created manually or automatically based on self-defined structures. This is a pre-plugin, which is "Ready to Use". The solution can be customized to meet individual requirements.

IBM COLDLib

Enables the Levigo document platform viewer to display FileNet COLD2 documents with or without templates.

IBM Workflow PDF Generator

The service, which can be used within workflows, enables workflow data and content in a PDF document.

Workflow Task Delegation

This component is usable with IBM Business Automation Workflow (BAW). It allows for managing rules that define substitutes in user absence situations due to illness, vacation or the like.

Workflow LDAP Query

This component is usable with IBM Business Automation Workflow (BAW). The service connects to a directory server like Active Directory (LDAP) and executes search queries within BAW via LDAP protocol.

Infrastructure Tools

Improve the quality and take advantage of your platform in more places / ways.

ASSETS

IBM FileNet MultiSystemSynchronization

Keeps two IBM FileNet Image Manager (IM) systems in sync for disaster recovery and also increases IM performance.

IBM Signature Foundation for FileNet Content Manager

Ensures document integrity and compliance with signatures. It enables users to create, store and verify signed documents and signatures.

UTILITIES

IBM Performance Comparison Dashboard for Content Management

Discovers performance leaks. Maximizes the value of an ECM investment by identifying the causes of poor system performance and recommending appropriate changes to increase the overall performance of an IBM FileNet or IBM Content Manager system.

Administration Tools

By using these powerful tools an administrator can optimize the admin effort and admin time that he invests every day and increase the quality of his administrative work at the same time.

ASSETS

IBM FileNet UpdateManagerCE

Keeps a P8 System in shape. UpdateManagerCE is a tool to perform various operations on a small, medium or large set of objects stored inside IBM FileNet Content Manager systems.

UTILITIES

IBM Content Manager Batch Utility

A tool to perform various operations on a small, medium or large set of objects stored inside IBM Content Manager systems.

Further Utilties

UTILTIES

IBM HTML TO PDF Generator

Using this containerized web service, PDF documents can be created from freely configurable and designable HTML 5 documents. Traditional PDF rendition tools require a base file. This generator creates a PDF document using data and an HTML document dynamically.

IBM Industrial Service Hub

Companies, who want to make their services available to their customers on a digital platform, can offer their customized solution based on this framework in the shortest possible time, with little effort and minimal risk.
